Contact Lens Evaluation & Policy

In order to maintain the highest standards for your ocular health, all patients interested in wearing contact lenses must undergo a contact lens specific evaluation and fitting. This goes for new and existing contact lens wearers. Contact lenses are considered FDA-approved medical devices so this evaluation ensures that your eyes are healthy enough to begin or continue wearing contact lenses. This evaluation must be done annually and is considered a separate service from the general eye health examination.

During the contact lens examination, follow-up visits may be necessary to trial new lenses and/or monitor eye health. All follow up visits must be completed within 90 days of your initial contact lens fitting to finalize your contact lens prescription and to avoid additional fees.

Contact lens Evaluation/Fitting Fee:
Spherical: $94.24
Toric: $115.18
Multifocal/Monovision:
Specialty: $136.13
Insurance copay/allowance:_____

Contact lens after care: $45
Should you need additional follow-up care after the 90-day allowance, a fee will be charged per after-care visit. This fee will cover additional follow-up visits for the next 30 days.

Contact lens insertion & removal training: $50
Required for all patients who are new to contact lens wear. This one-on-one training is not included in standard evaluation and after-care visits.

I have read and understand the above fees and accept responsibility for the amount being charged for all applicable services being rendered today. I also understand that if my insurance is billed for my evaluation, it is my responsibility to pay for any remaining balance that is unpaid by my insurance. I am aware that the above fees are non-refundable and that my prescription for contact lenses will be released to me when the fitting process is complete and all fees have been paid

Patient Name:_____ Date:_____
